Euronet and IBIS Management Announce Worldwide Partnership
Banks will benefit from highly intelligent and profitable global banking solutions

Little Rock, Arkansas, USA, and Willemstad, Curacao, (April 20, 2010) – Euronet USA (Euronet), the software division of leading electronic payments provider Euronet Worldwide, Inc. (NASDAQ:EEFT), and IBIS Management, the fastest growing provider of highly intelligent international payment processing and global electronic banking services, today announced that they have formed an alliance to market and support one another's product portfolios.

"Banks across the world will be taking a giant leap forward in the profitability and efficiency of their back-office operations now that our companies have teamed up," said Clark Russel, CEO of IBIS Management. "We are both experts in our own field and our strong products testify to our success."

The partnership will enable Euronet to provide seamless straight-through-processing and real-time preventative compliance filtering for payments entering and leaving the bank via the ITM channels. Payments such as SWIFT International payments, ACH Payments, Bankers drafts and credit card settlement will be passed from Euronet's online banking and point of sale channels to IBIS Management's Alchemy Payment Processing Suite electronically for posting, compliance checking and fulfillment. This automated end to end processing will eliminate traditional, costly and risky manual-based activity at the bank's back office. Banks will immediately benefit from substantial cost and risk reduction, and higher margins on each payment generated.

Euronet's broad range of transaction management solutions uses an interactive engine called Integrated Transaction Management® (ITM) which resides at the core of its payments hub architecture. The ITM system is installed in more than 70 countries, and ensures absolute consistency and control across multiple customer touch points. ITM can result in the significant reduction of overhead costs that is typically associated with multiple delivery systems and vendor interfaces.

"After working on joint client projects, we spotted a real synergy between our offerings for international banks," said Cindy Ashcraft, Managing Director of Euronet. "Euronet is a world leader in international payment processing solutions, and we are constantly seeking ways to deliver even greater agility and flexibility in payment channels to our client base. This partnership with IBIS Management will allow us to deliver compelling results in the area of enabling SWIFT payments and other types of payment processing."

About IBIS Management

IBIS Management is a privately held, trusted advisor to banks in more than 30 countries throughout the Caribbean and the Americas. IBIS makes banks “profitably efficient” by helping them improve their international payment processing, risk management and operational best practice.

The Alchemy Payment Processing Platform has been developed by IBIS Management’s banking and technology experts to enable banks to run highly automated, profitable, and compliant banking operations that deliver outstanding performance and client satisfaction.

In addition to developing proprietary systems, IBIS Management advises Central Banks, Retail and Private Banks on operational best practice in international banking. IBIS Management advisory services include BASEL II Preparation, AML and Regulatory compliance, Reconciliations and SWIFT Outsourcing. For more information, please visit www.ibis-management.com.

About Euronet
