

# The Basel II Project Implementation

## Executing Your Successful Strategy

### How do you Implement your Basel II project?

The Basel II Readiness Program covers four important stages:

- 1) The Basel II Report Card (Gap Analysis)
- 2) Strategic Advisory Services
- 3) Project Management Planning.

With all the research and highly complex planning done your bank will still need to roll up its sleeves and prepare for a lengthy process of implementation and testing.

Frequently key executives cannot be pulled away from existing daily operations and special projects in order to do the full-time work of implementing Basel II.

### Do you have the available resources for this complex and lengthy project?

With our turn-key project implementation services we cover all the detailed operational tasks which are required for the execution of your Basel II project so that your key staff will be available for their daily tasks.

During implementation we address matters such as business analyses, testing, project documentation, and your project solution.

### What level of support will I receive?

We will be on site during the necessary activities to reach your project milestones on time and on budget. Every task will be carried out based upon the pre-determined Strategy and Project Plan.

### Who will benefit?

The entire organization will benefit. However, the staff responsible for the operational execution of Basel II, will not have the additional project implementation workload. But they will be closely involved during the project execution and will have the final say in the decisions.

### How long can project implementation take?

The scope of the project will vary according to the size and complexity of your bank, the strategy chosen and your current level of knowledge and readiness.

The average bank will typically take between 6-18 months of project implementation in the areas of staff training, systems change and procedural updates in order to fully comply with the stringent Basel II requirements.

To get started contact us to discuss your needs and we can ensure a smooth and quick start to Basel II compliance.
